

Iteration Plan for Marconi Books

16/10/2019 – 12/12/2019

Revision History

| Author | Date | Description |
|-----------------|------------|-----------------|
| Mattia Sandrini | 20/01/2020 | Initial Release |

1. Objectives

[Define the purpose and scope of the iteration] The purpose of this iteration is to create a working skeleton of the system. At the end of this iteration, Marconi Books should be able to:

- Create an account
- Add a book into the database
- Enter search criteria for a book
- Ask to display the detail information of an account

2. Use Cases

[Identify the use cases that define the functionality being implemented during this iteration.]

The following use cases are involved in this iteration:

- .UC1: Create Customer Account – The basic flow of this use case will be implemented.
- .UC2: Display Book Info – The basic flow and a few of the alternate flows in this use case will be implemented.

3 Task Schedule

[List the detailed tasks needed to carry out the objectives of this iteration.]
