JUSTIFICATION
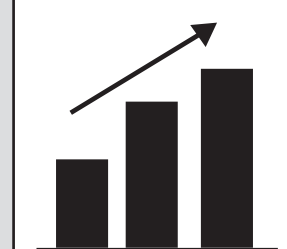

This project born from the will to solve the problem behind book commerce, by create a simple interface for books exchange.

PRODUCT

Web platform that contains multiple section to conduct buying and selling operations.

EXT STAKEHOLDERS

Drago Nicola
Bileddo Antonino

ASSUMPTIONS

A user could found it useful in order to spare time, instead of going through different shop searching a determinate book.

RISKS

Team member absences and the coming of days off could affect the possibility to follow the project plan.

SMART OBJECTIVE

Develop a service to manage sales and purchases of school books.

REQUIREMENTS

Good skills about PHP language and HTML.
Motivation and enthusiasm in the research and in the learn of new knowledge and topics.

TEAM

Team 4:

Mattia Sandrini
Isoni Davide
Alessandro Bonizzato

DELIVERABLES

A well build website, simple, complete and secure.

TIMELINE

October:
  start the project.

November:
  check the partial result.

December:
  end and deliver a first working version of the project.

BENEFITS

Get simple service to find and to sell school books.

CONTRAINTS
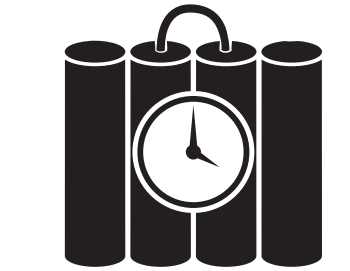

The main restriction is the deadline, because in few time must be completed the project.

$$$ COSTS

There is no cost in the project production, but it requires a web domain and a server to make it accessible.
